TRAINING PROGRAMME

INTRODUCTION

The UEMS ORL-HNS Section and the Board of Otorhinolaryngology has revised the European subspecialty training programme in 2024. This programme will serve as a guideline for training centres enabling them to meet the European Standard as set out by the European Board of UEMS. We are moving towards competence-based assessments.

WORKING GROUP

Cem Meco, Sverre Steinsvag, Jan Løhler, [Dilyana Vicheva](#)

DEFINITION

Otorhinolaryngology-Head & Neck Surgery (ORL-HNS) is the specialty which deals with functions and diseases of the ear, nose, throat, skull base, head and Neck. Disorders include trauma, malformations, tumors and other disorders in childhood and in adults of the ear, temporal bone, lateral skull base, nose, paranasal sinuses, anterior skull base, oral cavity, pharynx, larynx, trachea, esophagus, head, neck, thyroid, salivary and lacrimal glands and adjacent structures. It also includes investigation and treatment of conditions affecting the auditory, vestibular, olfactory and gustatory senses and disorders of the cranial nerves as well as human communication in respect of speech, language and voice disorders. Some of the conditions diagnosed by otorhinolaryngologists but located in adjacent areas will be treated with close cooperation with these related specialists.

The subspecialty of nose and paranasal sinuses is composed of surgeons who have acquired specialized knowledge and high surgical skills during their subspecialty training in the history-taking, examination, investigation and treatment planning (surgical and non-surgical treatment) of benign and malignant conditions, malformations and trauma in the nose and paranasal sinuses as defined in the accompanying subspecialty log book.

THE TRAINING PROGRAMME

The training programme will consist of the following elements:

1. Acquisition of the principles of surgery in general and theoretical knowledge of anatomy, physiology, pathology, aetiology, symptomatology and treatment of diseases of the nose and paranasal sinuses.
2. Trainees should have access to facilities for nose and paranasal sinus dissection. They should be able to familiarize themselves with the basic techniques of surgery in the nose and paranasal sinuses, with either real or virtual surgical and endoscopic techniques.
3. A list of diagnostic procedures, non-surgical management and surgical management is outlined in this subspecialty logbook.
4. The Subspecialty training programme requires documentation of all skills and operative procedures/management itemized in the section of surgical management. Confirmation of the progression of the trainee to the required competency is necessary.
5. This subspecialty log book will be used in relation to European training exchange.

ASSESSMENT AND EXAMINATION

1. Examination of the theoretical and practical knowledge of the trainee can be included in the training programme. Trainees should remember also refer to their national requirements.
2. To achieve the award of the certificate of recognition, the trainee must reach the expected level of knowledge and skills approved by the training programme director before being eligible to practise as an independent nose and paranasal subspecialist.
3. Each trainee must be familiar with all diagnostic and therapeutic (surgical and non-surgical) management associated with the discipline of the nose and paranasal sinuses

4. The trainer will be responsible for confirming the competence of the trainee for the procedures and management outlined in the subspecialty logbook.
5. The contents of the log book will be continuously updated by the UEMS-ORL-HNS Board at least every 5 years with respect to new developments.
6. The recommended syllabus for the European Board Exam in ORL-HNS includes this logbook produced by the UEMS ORL-HNS Section, and the Intercollegiate Surgical Curriculum Programme Syllabus.

TRAINING CENTRE ROTATION

Trainee: _____
Name Surname Birthdate

Dates of start and finish of training period	Training Centre	Name of Trainer	Signature of Trainer

ATTENDANCE AT ACCREDITED COURSES AND MEETINGS

Date	Course	Comments

UEMS TRAINING LOGBOOK OF NOSE & PARANASAL SINUS COMPLETION OF TRAINING

Trainee: _____
Name Surname Birthdate

Date of commencement of training: _____

Date of completion of training: _____

Lead Trainingcenter	
Name of Trainer in charge	

I, the **trainer in charge**, certify that the register of diagnostic, non-surgical and surgical management shown below is correct.

Date: _____ Signature of trainer: _____

I, the **trainee** certifies that the details given refer to diagnostic, non-surgical and surgical management carried out by me personally or were operations at which I acted as assistant.

Date: _____ Signature of trainee: _____

CONTENT OF THE NOSE AND PARANASAL SINUS LOGBOOK

The log book is divided into the following sections.

A: Diseases/Disorders of the nose and paranasal sinuses

B: Patient assessments and Diagnostic Procedures

C: Non-Surgical Management

D: Surgical Management

E: Postoperative complications

The relevant trainer should endorse by signing and dating, when the trainee has achieved competency in each particular management or procedure

NOSE, PARANASAL SINUSES and anterior/central skull base.		
A: Diseases/Disorders of the nose, paranasal sinuses and anterior/central skull base - theoretical knowledge		
Nose		Signature trainer when competency achieved
Congenital malformations of nose, mid-face (cleft lip, palate), including genetic anomalies, rare diseases		
Infections of nose		
Neoplastic conditions: benign and malignant		
Nasal and facial trauma		
Management of septal disorders (deviations, perforations)		
Epistaxis		
Inflammatory and allergic conditions (rhino-allergology and concept of united airways)		
Non- allergic rhinitis		
Olfaction		
Paranasal Sinuses and anterior/central skull base		
Congenital malformations		
Acute sinusitis and complications		
Chronic rhinosinusitis primary/secondary, localized/diffuse, type2/non-type 2		
Inflammatory and granulomatous systemic conditions including sarcoid, tuberculosis etc.		
Neoplastic conditions: benign and malignant		
Barotrauma		
Empty nose syndrome		
CSF leak		
B. Patient assessment and Diagnostic Procedures		
a) History and Clinical Examination		
		Signature trainer when competency achieved
Assessment of nasal symptoms: nasal obstruction, rhinorrhea, anosmia, hyposmia, facial pain or headache, epistaxis, olfaction		
Anterior and posterior rhinoscopy		

Nasal endoscopy		
Visual documentation (example: photography, videoendoscopy, nose app)		
Ethnic variation, proportions of face, effects of aging		
b) Tests of Function		
		Signature trainer when competency achieved
Rhinomanometry		
Acoustic rhinometry		
Olfactory tests (subjective and objective)		
Ciliary function tests		
Peak Nasal Inspiratory Flow		
c) Tests of Imaging		
		Signature trainer when competency achieved
Conventional X-ray		
CT scan		
Cone beam CT		
MRI scan		
Isotope scan		
Angiography		
Understanding the use of navigation devices		
d) Allergy Investigations		
Understanding and performing clinical tests for atopy (skin prick tests, RAST, nasal provocation tests, etc.)		
Management of complications during allergy testing (anaphylaxis etc.)		
C. Non-Surgical Management		
		Signature trainer when competency achieved
Pharmacological therapy		
Specific immunotherapy, -(Subcutaneous and sublingual)		
Management of anaphylaxis		
Selection and use of biologicals		

Nasal rinsing		
Allergen avoidance advices		
In-office therapy – nose applicators for CRS, stem cells		
Trigeminal neuralgia		
D. Surgical Management		
Nose		Signature trainer when competency achieved
local and regional anaesthesia		
Management of epistaxis		
<ul style="list-style-type: none"> Nasal packing, anterior and posterior Nasal cautery and other endoscopic management Medical disease and epistaxis Ligation of arteria sphenopalatina and internal maxillary artery, anterior and posterior ethmoidal arteries. 		
Foreign body removal		
Nasal Polypectomy		
Turbinate procedures (including coblation, radiofrequency etc.)		
Septal surgery		
Septal hematoma/ septal abscess management		
Management of septal perforations		
Management nasal factures and maxillo -facial fractures		
Management of soft tissue injuries		
Management of nasal skin tumors with / without flaps, grafts		
Revision septoplasty		
Septorhinoplasty (open and closed, reduction, augmentation, grafting techniques, cleft lip septorhinoplasty)		
Rhinophyma operation		
Correction of congenital malformations (choanal atresia, fistulas, dermoids etc)		
Harvesting material for reconstruction (rib, cartilage facia lata etc)		

SINUS SURGERY		Signature trainer when competency achieved
Sinus endoscopy		
Antral lavage		
Endoscopic antrostomy and sinus endoscopy		
Caldwell Luc		
Frontal sinus trephination		
External frontal sinus surgery including obliteration/ canalization.		
External ethmoidectomy		
Endoscopic Sinus Surgery and its possible acute complications		
Maxillary sinus procedures (medial maxillectomy, prelacrimal approach, Denker approach, transmaxillary pterygopaltina fossa and infratemporal fossa approach).		
<ul style="list-style-type: none"> • anterior ethmoidectomy 		
<ul style="list-style-type: none"> • posterior ethmoidectomy 		
<ul style="list-style-type: none"> • frontal recess / frontal sinus procedures (Draf 1 – 3, periorbital suspension/ orbital transposition, and mucosal flaps) 		
<ul style="list-style-type: none"> • sphenoid sinus procedures (lateral recess, medial petrous, trans-sellar, trans-planum, trans-clival, trans cavernous) 		
Surgery of floor of maxillary sinus		
Silent sinus syndrome - management		
Transorbital approaches		
Orbital decompression procedures (medial and lateral, balanced)		
Endoscopic dacry-cysto-rhinostomy		
Management of CSF leak and dura lesions		
Tumour Surgery		
<ul style="list-style-type: none"> • Maxillectomy (partial, total) 		
<ul style="list-style-type: none"> • Lateral rhinotomy 		
<ul style="list-style-type: none"> • Midfacial degloving 		
<ul style="list-style-type: none"> • Subfrontal approach (extracranial/ intracranial) 		
<ul style="list-style-type: none"> • Craniofacial resection 		
<ul style="list-style-type: none"> • Facial translocation 		
<ul style="list-style-type: none"> • Combined approach to anterior skull base
